

Supplementary file: Materials for Experiments 1 and 2

1 Experiment 1

Note: We present the grammatical double center-embedding version for each item. In each double center-embedding sentence, we group together a verb and preceding adverbs to form a “verb string” which we label, for convenience, as V1, V2, and V3. The post-verbal NPs are labeled as NP1, NP2, and NP3. The missing NP condition is generated by ending the double center-embedding sentence at NP2. Selected strings in the missing NP condition are replaced by the strings indicated in (i)–(iv) to produce the implausible conditions.

Glosses used: CL: classifier; DE: the particle *de*, for modifying nouns; EXP: experiential aspect *-guo*; FUT: future marker *jiang*; PFV: perfective aspect *-le*; PROG: progressive aspect *zai*

- (1) a. 系主任很信任曾探望过已经研究文学一阵子的老教授一两次的助教。
